

DataStorm² D2

UNIVERSAL CONTROLLER

DataStorm Evolved

Evolution:

The natural process of becoming more advanced; more powerful. The DataStorm has now evolved.

The New DataStorm D2 Universal Controller is the future of the DataStorm Internet system. Designed to work with the DW4020 or DW6000 series modems, the D2 simplifies and streamlines the DataStorm's general operations by providing a 2-button [Search & Stow] solution with no software to install on your computer. The new interface features an Ethernet port and embedded DataStorm software which can be accessed by a simple web browser. This configuration opens the door for ANY computer with an Ethernet port/ wireless card, and an Internet browser to use the D2. The D2 DVB will add the power and hassle-free operation of a DVB tuner, which in turn enables the DataStorm to be operated anywhere in the world. With so many new features and possibilities, the word evolution seems almost lacking;

revolution makes more sense. Welcome to the new MotoSAT.

DataStorm[™] F1

MOBILE TWO-WAY INTERNET

The DataStorm F1 .74 meter mobile internet satellite system is the first true two-way system approved by DirecWay and the FCC. Designed to automatically acquire the internet satellite in the sky, the DataStorm F1 uses motors, gears, and a GPS system to adapt to the mobile environment. It's unique fold-down design [10.5" when stowed] lets most vehicles become a stable platform for installation. The D2 and D2 DVB controllers gives the DataStorm F1 true plug-and-play capabilities with any computer or network compatible with the DirecWay platform. Other new and exciting options will soon be released that will allow for much greater bandwidth options and speeds.

- .74 Meter Dish
- True Two-Way Send/ Receive Mobile Satellite Internet
- 10.5" Stowed Height
- 105 lbs. total weight
- Optional Simultaneous Satellite TV with HDTV Compatibility
- Platform Options will include services other than DirecWay
- D2& D2 DVB Controller Capable

10.5"

DataStorm[™] F3

MOBILE TWO-WAY INTERNET

The DataStorm F3 .74 meter mobile internet satellite system is the first true two-way system approved by DirecWay and the FCC. Designed to automatically acquire the internet satellite in the sky, the DataStorm F3 uses motors, gears, and a GPS system to adapt to the mobile environment. It's unique fold-down design [12" when stowed] lets most vehicles become a stable platform for installation. The D2 and D2 DVB controllers gives the DataStorm F3 true plug-and-play capabilities with any computer or network compatible with the DirecWay platform. Other new and exciting options will soon be released that will allow for much greater bandwidth options and speeds.

- .1.2 Meter Dish
- True Two-Way Send/ Receive Mobile Satellite Internet
- 12" Stowed Height
- 175 lbs. total weight
- Designed for Extended Range and Higher Bandwidth Options
- Platform Options will include services other than DirecWay
- D2& D2 DVB Controller Capable
